

# Scientific Scent Training

In association with Advanced Canine Technologies®

In 5 days an insight into proven professional training methods validated by international government agencies.

1. Evaluation and selection of suitable dogs.
2. Practical imprinting methods, classical and operant conditioning.
3. Combination of odour recognition and body response (dog and human).
4. Sample preparation.
5. Optimising behaviours to a professional standard.

Make scientifically proven professional scent training accessible. With options to see and learn professional tips and tricks.

ALWAYS REDEFINING EXCELLENCE
